SELECTED PROJECT EXPERIENCE:

AATA International, Inc. – Lost Soldier and Lost Creek Uranium Project, Ur-Energy, Wyoming

Responsible for preparation of supporting documentation to prepare mine permit for an in-situ leach (ISL) uranium mining project in Wyoming. Task manager for socioeconomic and archaeological subcontractors. Coordinated purchase of meteorological station. Conducted initial research on regulatory requirements for permitting efforts in due diligence report.

AATA International, Inc. – Zaamar Goldfield Project, WM Mining, Mongolia

Project is aimed to modernize dredge mining operations to international environmental standards. Responsible for preparation of Environmental Impact Assessment document sections for a large placer mining project on the Tuul River, Mongolia. Conducted material research for preparation of Environmental Impact Assessment document. Assisted in coordination of report preparation efforts.

AATA International, Inc. – Tar Creek Project, Blue T Corp., Oklahoma

Project is located in a historic lead/zinc Tri-State Mining District. Conducted data gap analysis for the Tar Creek Superfund Rural Operable Unit #4 project. Reviewed documents and supported preparation of document database. Coordinated document production for Site Characterization, Remedial Investigation, and Feasibility Study reports.

AATA International, Inc. – Brisas Project, Gold Reserve, Venezuela

Project is to prepare and obtain approval for a bankable Environmental and Social Impact Assessment document meeting international environmental standards. Drafted sections for the International ESIA for Venezuela's largest gold project. Coordinated field sampling efforts and laboratory analysis, ordered and shipped environmental sampling equipment, managed document control efforts for project files,

AATA International, Inc. – Israel Electric Project, IEC, Israel

Reviewed regulatory section to World Bank standards. Provided regulatory information to include into EIA. Summarized remote sensing work for inclusion into the document.

AATA International, Inc. – Salt Creek Enhanced Oil Recovery Project, Anadarko, Wyoming

Responsible for and prepared sections for Environmental Assessment for the Salt Creek Enhanced Oil Recovery Project, which was a fast-track EA prepared under BLM NEPA rules. Conducted background material research. Assisted in document production.

AATA International, Inc. – Antamina Project, CMA, Peru

Assisted in technical report preparation for mine site in Peru, South America. Conducted research on metal ecotoxicology. Prepared figures for data analysis.

AATA International, Inc. – Tangguh LNG Project, BP, Indonesia

Coordinated efforts for onshore portion of EIA for greenfield LNG development project in a remote area in Indonesia. Conducted document and translation QA/QC for submittal to regulators. Ensured that both local and international requirements were included in the document. Coordinated efforts of internal and external team members and specialists.

AATA International, Inc. – TengizChevroil Project, ChevronTexaco, Kazakhstan

Prepared sections of Strategic EIA (SEIA) document for oil and gas project in Kazakhstan. Provided coordination and document control. Participated in preparation of project website.

AATA International, Inc. – Dieng Geothermal Project, Himpurna California Energy, Ltd., Indonesia

Coordinated preparation for permits in support of geothermal power plant exploration, construction and operation in Central Java, Indonesia. Managed client environmental department. Interfaced with EPC contractors for environmental management and monitoring efforts. Supported project financing and political risk insurance efforts. Liaised with local government officials. Conducted presentations during permit approval process. Selection, training and supervision of client environmental staff (field and head office). Preparation of work plan, schedule and budget proposals for client environmental program.

AATA International, Inc. – Batu Hijau Copper-Gold Project, P.T. Newmont Nusa Tenggara, Indonesia

Participated in permitting effort for a copper-gold mining project in Sumbawa, Indonesia. Conducted presentation to various government officials. Conducted technical translation review of permitting documents.

AATA International, Inc. – Patuha Geothermal Project, Patuha Power Limited, Indonesia

Coordinated preparation for permits in support of geothermal power plant exploration and construction in West Java, Indonesia. Interfaced with EPC contractors for environmental management and monitoring efforts. Supported project

financing efforts. Liaised with local government officials. Conducted presentations during permit approval process. Selection, training and supervision of client environmental staff (field and head office). Preparation of work plan, schedule and budget proposals for client environmental program.

AATA International, Inc. – Bali Geothermal Project, Bali Energy Limited, Indonesia
Coordinated preparation for permits in support of geothermal power plant exploration in Bali, Indonesia. Supported project financing efforts. Liaised with central government officials. Conducted presentations during permit approval process. Selection, training and supervision of client environmental staff (field office). Preparation of work plan, schedule and budget proposals for client environmental program.

AATA International, Inc. – Other Projects

Supported various efforts for other oil and gas, as well as mining projects in Indonesia, Russia, and FSU countries for preparation of reports, audits, and EIAs. Conducted research and prepared background material in support of website development efforts. Coordinated document sections (including translations) for client reports.

Translator – Himpurna California Energy and Patuha Power Limited, Indonesia
Provided translation and interpretation services for an international arbitration court between the Government of Indonesia and the private companies *Himpurna California Energy* and *Patuha Power Limited*.

Environmental Consultant – CalEnergy International, Inc.

Assisted Philippine subsidiaries of CalEnergy International with disposal of waste from geothermal operations. Reviewed construction operations of combined irrigation and hydroelectric power project.

EMPLOYMENT HISTORY:

- Environmental Task Manager, Document Control, AATA International, Inc. (2005 – Current)
- Project Manager and EIA Specialist, AATA International, Inc. (2000 – Current)
- Private Consultant (Jan 1999 – 2000)
- ASEAN Program Coordinator, AATA International, Inc. (Apr 1995 - Dec 1998)
- Research Assistant, University of Texas Marine Science Institute (Jan 1994 - Mar 1995)
- Graduate Research Assistant, University of Texas Marine Science Institute (Jun 1990 - Dec 1993)

LANGUAGE SKILLS

English (fluent), Indonesian (fluent)
